Message

Hi Folks,

I will not be in attendance at tonights meeting,

Ron Stevenson and I installed the plastic caps on all the day marker pilings.

We also capped the one new piling for the sign and have another cap ready when the other piling is driven.

Last months we installed 2 new no wake buoys at river entrance channel. We cut the chain on the Mennucketesuck Rock Buoy and placed a new rock buoy and anchor on same location. What a brute Ron is with bolt cutters in a bouncing boat!!!

Ron and I had some discussion about placing the other no wake signs but wanted to wait as we believe the Commission had some thoughts for up river??? My experience has been to place them on piling vs putting on stakes as they tend to last longer.

We have installed 3 No Wake signs.

+Roy Christainson's dock by stone jetty.

+Pilots Point fuel dock.

+Bruce had requested a sign in the Patchogue River by Harry' Marina so we placed one on day marker #10.

Have a good meeting,

Dave Russell
